The critical nature of our collaboration with the educational vision of USFCA's art and educational mission of USFCA's art and educational mission of USFCA's art, and critical issues of our times, to engage our students through art and technology.

The USF Institute for Research in Art's commitment to International Peace and its belief that "one contact through art" could be an effective tool in understanding and perceptual shifts that are required of all of us as we engage group imagery and model the perception of collective authorship and civic participation; the work of artists whose practices lie at the core of international themes of social engagement and social-historical form.

The USP Institute for Research in Art's commitment to international peace and its belief that "one contact through art" could be an effective tool in understanding and perceptual shifts that are required of all of us as we engage group imagery and model the perception of collective authorship and civic participation; the work of artists whose practices lie at the core of international themes of social engagement and social-historical form.

The critical nature of its content correlates with the educational mission of USFCA to engage our students through art and technology.
